

Digital Fashion Illustration:

I add this technological component to the second semester or Fashion II class for those students continuing their fashion design studies. I recommend the book [Figure Poses for Fashion Illustrators](#) available from Amazon with a CD included with over 200 fashion figure templates that are copyright free. These can be used with Photoshop and students can add patterns, colors and clothing to the fashion figures.

Here are examples of designs created on the computer in Photoshop by my students:

Level II Fashion Design Student using laptop to create computer designs while Fashion I students nearby are drawing traditional illustrations.

Links for using technologies in fashion design-
